

Premium Restoration

## 3M ESPE Lava Crowns & Bridges

*The first choice for premium restorations*

### 3M ESPE Lava

3M ESPE Lava™ is a leading brand in zirconia restorations. Its precise fit, strength and natural aesthetics make Lava the first choice for demanding applications.

3M has over 100 years of manufacturing experience and has undertaken more than 25 years of zirconia research and processing. All Lava products are created using CAD/CAM technology for exceptional fit.

**High strength and durability:** the strength of zirconium oxide is much higher than that of conventional all-ceramic materials.

**Accuracy of fit:** the Lava system has excellent accuracy of fit, due to the CAD/CAM milling process.

**Biocompatibility:** both the zirconia and the overlay porcelain are fully biocompatible. Lower thermal conductivity provides comfort for the patient.

Race Dental Laboratory is an Authorised Lava Milling Center.

### Approved Indications

- Single crowns
- 3- and 4-unit bridges with multiple abutments
- 5- and 6-unit bridges
- Splinted crowns (up to six units)
- Cantilever bridges (up to four units)
- no single abutments.
- suitable for anterior and posterior applications

### Warranty

Lava restorations are warranted by 3M ESPE, and are accompanied by a warranty card which can be verified online via their website.
