

Orthodontics

Specialised products, expert technicians

Race Dental Laboratory provides a wide range of orthodontic appliances. We understand that Orthodontics is a specialised area which requires technicians to have a great understanding of the needs of the patient. Our orthodontic technicians are fully qualified and experienced in dealing with a range of appliances.

Our range is extensive and we can create any custom orthodontic appliance to suit. Some appliances we commonly manufacture are:

- **Retainers:** Hawley, Begg, Trutain, Spring Hawley 6-6, Spring Aligner 3-3
- **Expansion Appliances:** Schwartz, Sagittal, Sagittal/Schwartz, 3D, Fan Appliance
- **Functional:** Twin Block, Bionator, Herbst Appliance
- **Fixed Appliances:** Space Maintainer, Lingual Arches, RMEs, Transpalatal Arch, Quad Helix

Laser Welding

Our expert technicians are skilled in laser welding and we employ this technology whenever welding is required, ensuring maximum strength while also minimising bulk.

Indirect Bonding

Our orthodontic technicians have extensive experience in indirect bonding, giving accurate bracket placement and allowing you to maximise the efficiency of your practice.

Expert Advice

If you have any special design requests, or require something that is not mentioned on this page, our specialised orthodontic technicians are happy to speak with you to assist in arriving at the best solution.
