

Premium Restoration

Premium PFM Restorations

Traditional solution, premium aesthetics

The Premium Choice

Race Dental Laboratory's Premium porcelain fused to metal restoration (PFM) offers a wealth of custom options which ensure an exceptional result. Those dentists seeking a high-quality, customised solution using traditional materials will appreciate the degree of workmanship which is invested and the time spent on each stage of the restoration is much higher than for our standard crowns. All finishing is undertaken by a senior technician.

Different types of alloys are available to suit your needs:

- Cast precious yellow gold
- Cast semi-precious gold (silver-coloured)

All the alloys we use are fully biocompatible and TGA-approved.

A premium PFM's multi-layered porcelain finish incorporates internal effects in including mamelons, lobes and premier anatomy.

Benefits

- A choice of margin options to suit your needs
- Special attention to contour, occlusion, contacts, shape and occlusal anatomy
- Customised aesthetics including multi-layering, staining, fissures and internal effects
- A 10-20x microscope accuracy for excellent fit
- Special attention to emergence profile and curves of Spee, Wilson & Monsoon
- An optional ShadeVision shade matching service (additional charges may apply)
